Issue 2) the leads for and application status colour and style still not the same as the frontend demo. same status should have same colour but different status type should have different colour

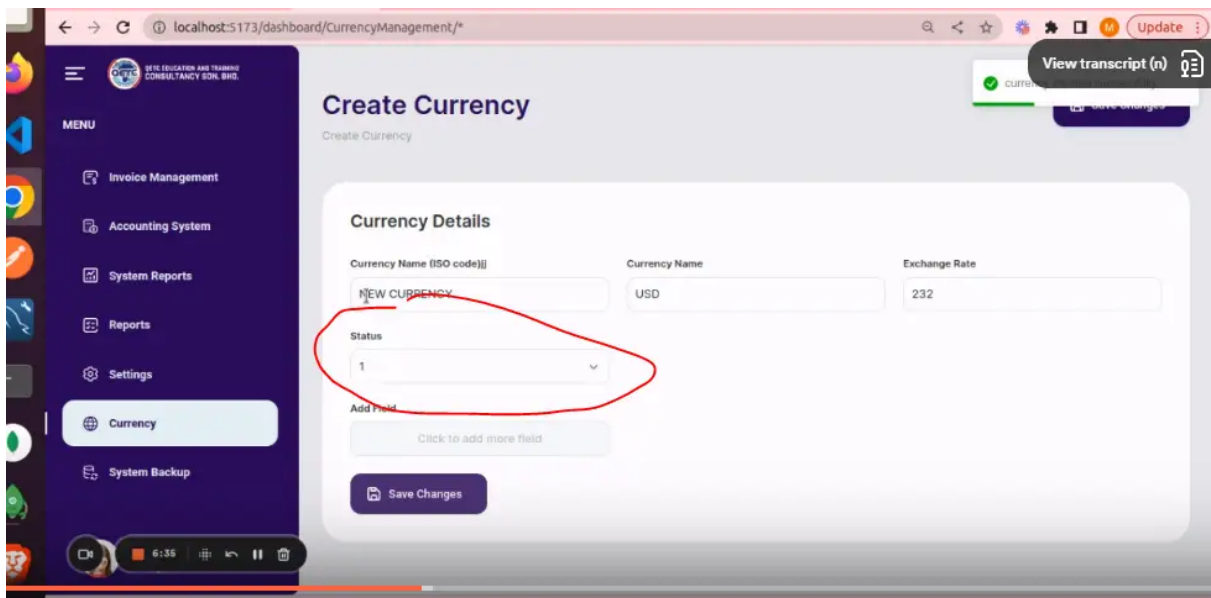

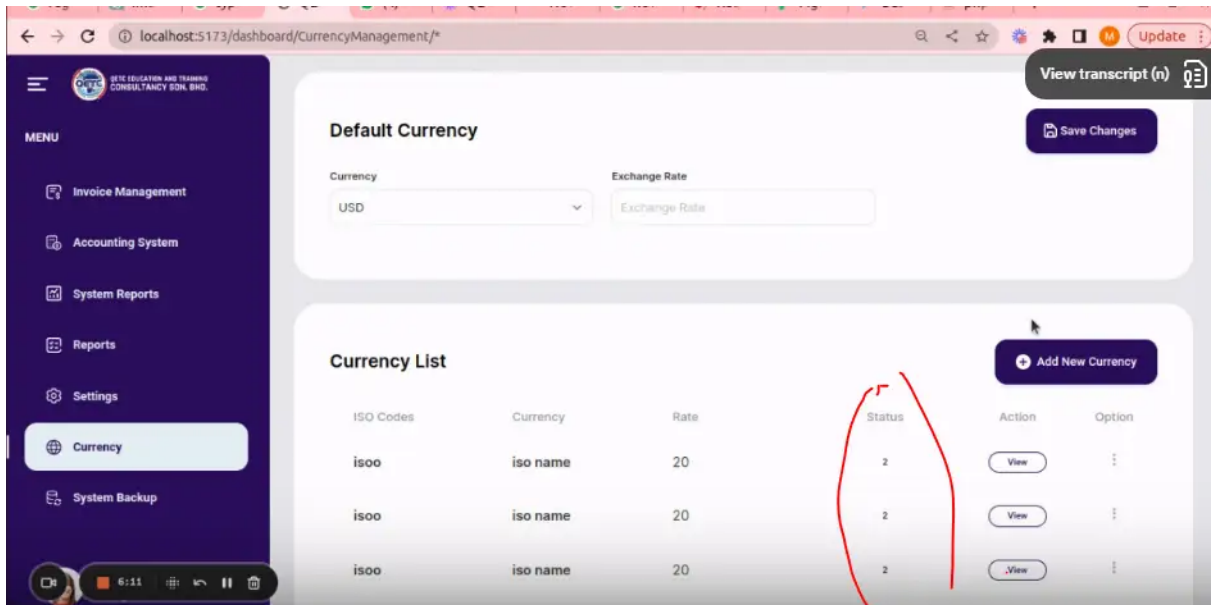

Issue 3) will this page auto refresh when the user clicks generate code? we want it to auto refresh when generate..i think it should refresh page first then the notification appear

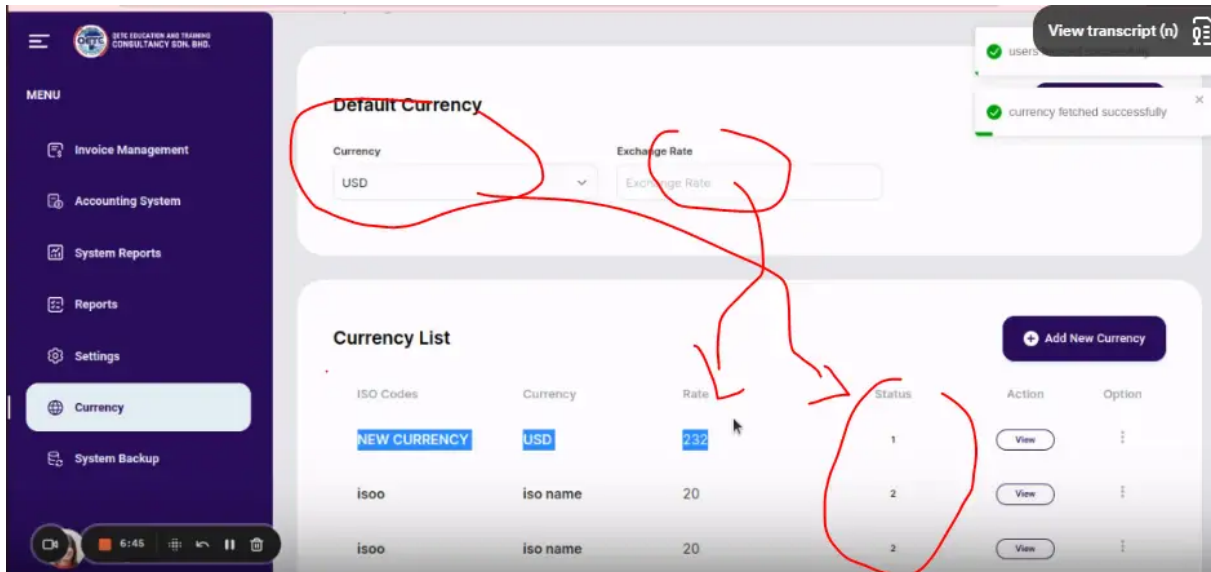

Issue 4) can u fix this delete frontend..the delete text should only appear when its hover over delete button

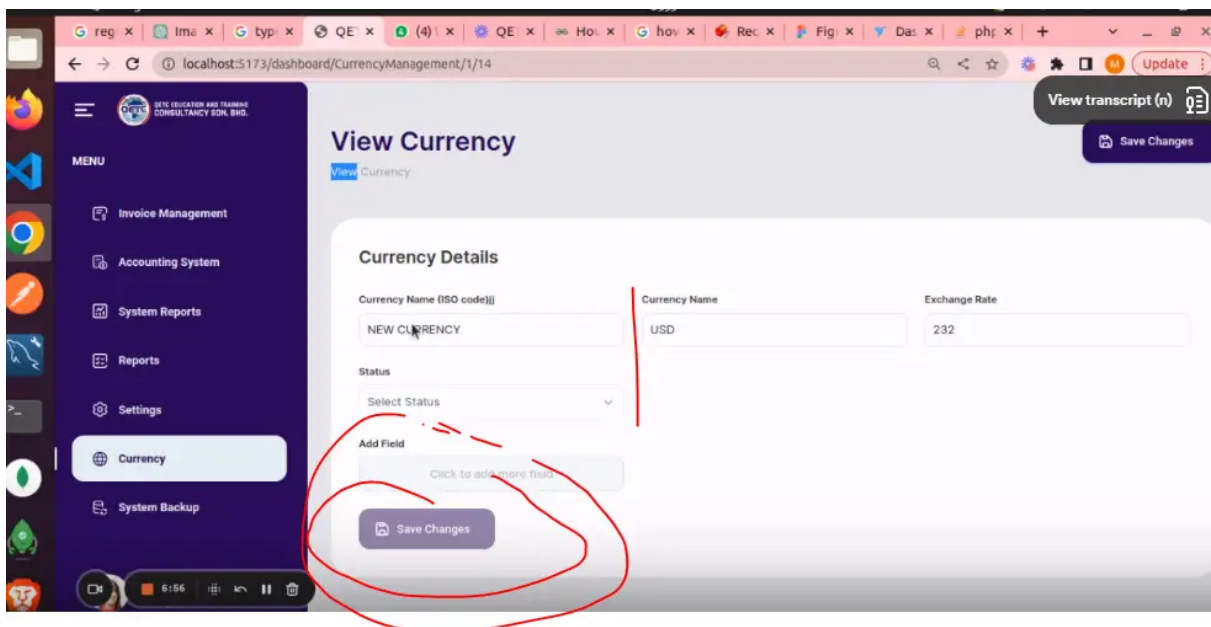

Issue 5) Can u fix this subtitle position

Issue 6) the status should only have 3 static dropdown, Active and Inactive only..inactive status on list should be red outline status

Issue 7) the currency dropdown should fetch an active list of currency created only bro. when fetch the exchange field will fetch from its Rate table value

Issue 8) When view function page, can u hide the save button and replace with back button. also hide the add new form..this all applies to all view screen in the system bro

Issue 17) can solve me how to avoid duplicate id for leads? Every lead has their access to view the application and single leads can apply multiple applications but single access. also we need to figure out where to put the username and password for the leads access

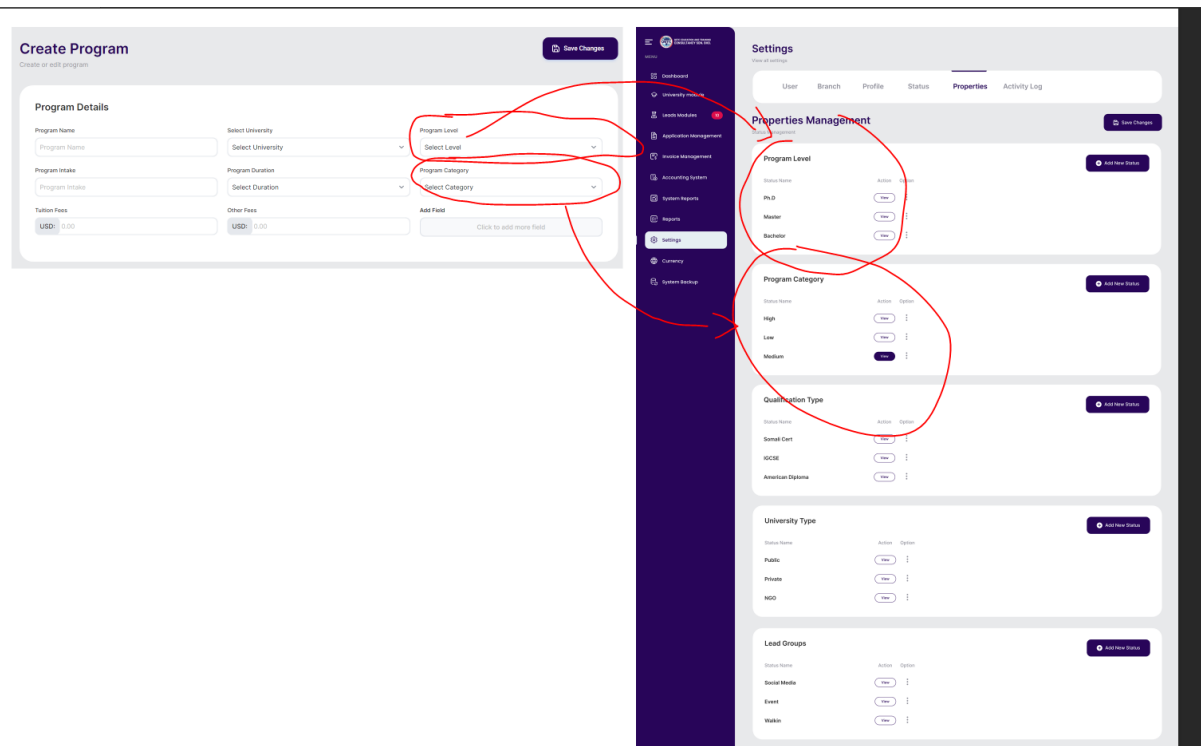

Issue 18) when user click on add more field, a popup to enter label and placeholder will show. this also applies on other screen module..just in invoice and receipt later can add another Select Field Type. this template already ready on iadd invoice page on each button of add more field

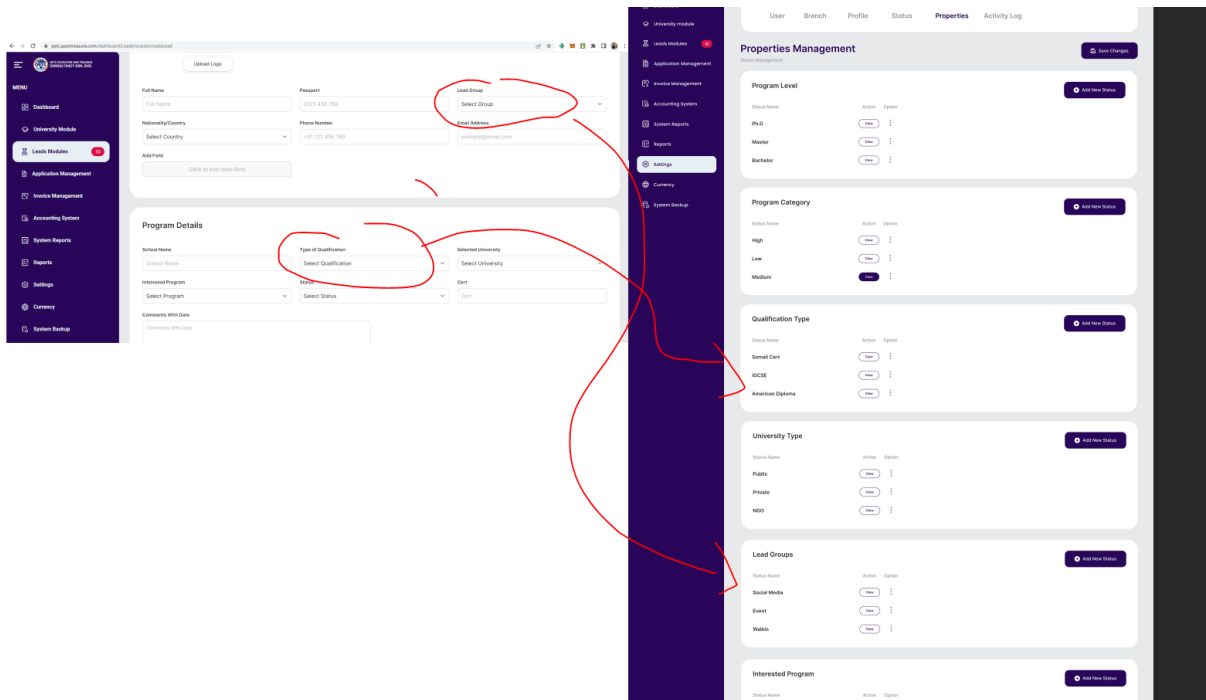

Issue 19) This university dropdown must fetch from the University List and the interested program dropdown will depend on the the academic list based on each university provided

University Type

Program Level and Program Category

Lead Group, Type of Qualification

Issue 20) University Type, Program, Program Category, Lead Group, Type of Qualification list dropdown should fetch from the Setting > Properties section
